<u>GENNARK</u>

MS4 Modular Genset

SPECIALLY DESIGNED FOR FLEXIBLE CHASSIS

The MS4 is a unique genset that fits almost any chassis. This genset has been especially designed for flexible chassis, which usually would not have the space for a standard undermount genset. Because of its compact permanent magnet alternator, the unit uses less fuel, is sound proof and it weighs much less than all current models of the competition. This combination makes the MS4 genset unique in its industry.

SPECIFICATIONS

MOTOR	Type: Engine size: Certification: Noise level: Average fuel consumption	4TNV88 2.286 liter ARB-OR, EPA Interm TIER 4 65 dBa 2 liter per hour @ 380V/50Hz output
ALTERNATOR	Type: Power: Efficiency:	GM4-160 50Hz / 15kW (18,75 KVA) 60Hz / 17kW (21,25 KVA) 94.3 % Unique feature of this alternator is that it is able to handle 3 x 1 phase circuit with varying loads, as well as 3 Phase loads at the same time. This enables the unit to supply 380 V/50 Hz and 220V/50Hz at same time (if needed).
CONTROLLER	Function: Safety: Extra option:	Automatic "pre-heat" Start Alarm list Alarm reset Hour meter Voltage check Oil level & water temperature Controller can be mounted on the chassis for more comfort Unique feature on the controller we use is that in case the controller is giving problems the units can be switched into an emergency by-pass which will run the unit without the controller so cargo can be saved.
WEIGHT	Modular excluding tank Tank 100 liter including straps	400 kg / 881,8 lbs 14 kg / 30,86 lbs
ISIONS	588mm 23, 1 inch	

WARRANTY AND SERVICE LEVEL AGREEMENTS

WARRANTY

Genmark offers multiple service agreements to ensure a genset in perfect condition. Genmark recommends a yearly inspection or every 1000 hours.

One year after the date of in service, repairs and replacement need be to carried out through designated Genmark service centers. Warranty is only applicable under normal use and service of the genset. Consult your Genmark representative for complete warranty details.

Optional: Extend warranty to 2 years.

Optional:

a. Generator up to 5 years or 5000 running hoursb. Radiator up to 5 years or 5000 running hoursc. Engine up to 5 years or 5000 running hours

SERVICE AGREEMENT

Genmark offers various standard service agreements. The service agreements covers all maintenance as stated below. It is also possible to tailor a service agreement, based on your speficiations and needs. For more information about the service agreements please contact someone of our salesteam.

Yearly inspection contains:

- Yearly inspection of genset
- Replacement of oil filter
- Replacement of air filter
- Replacement of fuel filter
- Replacement of V-belt
- Software updates
- Valve check

Besides the superior specifications of all Genmarks products, it's a specialist in customizations. Based on customer needs Genmark can compose the best genset. Below you can find the most common extra options.

SPECIAL FEATURES	-	24 kW upgrade (460V / 60Hz) Air filter silencer, - 2 dB Enlarged fuel tank of 150L or 170L Cables & plugs 12m or 20m
CONTROLLER	-	Fitting controller to chassis Advanced remote monitoring device
PAINTJOB/WRAP	-	Paintjob genset panels RAL color (non metallic) Wrap frame in color of choice Wrap panels in color of choice
SPECIAL KITS	-	Winter kit: Max -30 Celcius ADR kit (only in combination with 24 kW, ask for more information)

6 REASONS WHY GENMARK CHOOSES PERMANENT MAGNET ALTERNATORS

Genmark use high quality permanent magnet alternators especially designed for the transport power generation industry. With over 10 years of investment into research and development, Genmark continues to develop new and efficient cutting edge technology, and manufacture alternators to the highest quality standards.

REMOTE MONITORING

Our experienced service team watches over your gensets during usage with a monitoring platform. You know 24 hours a day, 7 days a week where your gensets are. Because of the 24/7 visibility of your gensets, less problems due to non-operating gensets will occur. Thanks to more available information about running hours and overall state of the genset, service will be on time and more effective.

Client Office Able to monitor data from gensets

Data

Running Hours Fuel level GPS Location Geofence Reefer Connection

Genmark Office

Able to monitor and perform service calls in case of malfunctions

CUSTOM MADE SOLUTIONS

Genmark is the specialist in custom made genset solutions. All divisions are in-house, for this reason Genmark is very flexible and able to produce gensets based on custom requirements. For example Genmark installed for Renault and Volvo a customised MS4 on the truck itself. The MS4 is directly connected to the fuel tank of the truck, therefore a seperate fuel tank is not needed.
