

MODULAR MSS

- ✧ LOW NOISE LEVEL
- ✧ LOW FUEL CONSUMPTION
- ✧ LOW WEIGHT
- ✧ 1000H SERVICE INTERVAL
- ✧ EXTRA ROAD CLEARANCE

The Genmark MODULAR generator is designed for flexible / extendable skeletal trailers and is positioned on the left or right side of the trailer (depending on your needs).

The Genmark Modular Generator Set's unique feature is its approved (RDW) function as a side protection device. The design results in a strong unit with more light weight and higher ground clearance than previous models.

It can be quite challenging to mount a generator on your sliding or flexible chassis. As the sliding mechanism often runs through the centre of the chassis, the genset needs to be positioned at the side of the chassis.

Our technical engineers at Genmark have found a solution for almost any type of flexible chassis.

With the MarkOne® controller positioned at the front of the unit, reading the display and quick checks are easy for the driver.

ENGINE

Yanmar STAGE V

2.286 liters

70 dB

1.8 liters @ 380 V / 50 Hz consumption

13.3 liters oil capacity

ALTERNATOR

RFL 24 kW

94.% efficiency

TANK

130 liters

170 liters optionnal

CONTROLLER

MarkOne® Controller

5 inch TFT screen

Electric fuel meer
